Bill Gates- and George Soros-backed Aspen Institute hit with censorship collusion lawsuit

America First Legal (AFL) is expanding a lawsuit it originally filed against just the Election Integrity Partnership (EIP) and Virality Project (VP) to also include the Bill Gates- and George Soros-backed Aspen Institute (AI).

AI – for the rest of this article, AI will refer to the Aspen Institute and not artificial intelligence – appears to be a major player in the so-called censorship-industrial complex, having worked in tandem with various tech giants and governmental bodies to attack online free speech, particularly during the 2020 and 2022 electoral periods.

After Donald Trump won the White House in 2016, apparently by "mistake" in that he was *not* chosen by the usual cabal (or so we are told), AI, EIP, VP, and many other groups launched into action a new approach to tampering with and stealing elections that involves censoring the truth online – especially on social media.

AI is famous for its "philanthropic" endeavors, being heavily funded by billionaire heavyweights like Soros and Gates. Between 2003 and 2020, the Bill & Melinda Gates Foundation alone sent more than \$101 million to AI, while Soros' Open Society Network gave AI upwards of \$3 million during the same time period.

(Related: Did you know that Bill Gates and his ilk want to "vaccinate" the entire food supply, forcing everyone to get poisoned one way or another?)

## **If the censorship-industrial complex can be brought down, will America once again have free and fair elections?**

---

In 2020, AI's Vivian Schiller hosted an event that AFL claims was specifically designed to manipulate social media engagement concerning the then-revealed scandal about Hunter Biden and his infamously incriminating laptop.

Then came the Twitter Files, which only further substantiated all this upon analysis. These show that the AI event was, in fact, planned for the purpose of intentionally redesigning and launching a new narrative about Hunter in order to protect the estate and reputation of the Biden Crime Family at large.

You see, to unveil Hunter's crimes is to unveil *all* of their crimes, including those of "the big guy," a usurper who currently occupies but does not belong in the People's House, also known as the White House.

It is obvious that the Biden Crime Family syndicate stole the White House from Trump, barring him from serving a second term. Whether you like the guy or not, Trump was clearly the winner, minus all the collusion and manipulation that kept him from serving a second term, which includes the aforementioned entities being pursued by AFL for justice.

What we have seen ever since the installment of Biden into the White House is nothing but scandal after scandal trickle its way down, only to be ignored by the mainstream media and its deep state operatives in media, government and elsewhere.

By pursuing AI, VP and EIP, AFL hopes to disable key mechanisms in the censorship-industrial complex that continue to hold Americans hostage in an empire of lies and deceit.

Included in the case is plenty of evidentiary support for its claims, including alleged emails that were sent between key players at AI to other key players at EIP and VP, clearly indicating their hidden partnership and mutual censorship agenda against Americans and their constitutional right to free speech under the First Amendment.

If the lawsuit is a success, AFL says that the criminal behavior that is uncovered in the process will constitute "an overt, intentional and explosive violation of the Constitution at the hands of the government."

President Stephen Miller referred to the lawsuit as a "landmark" moment in the fight against "the censorship-industrial complex."
